Kit consisting of TAG 210 + LB1150035. **BORDO MARE:** add S to the end of the selected code including LED colour to have the product supplied with sea treatment against salt spray. Powder coating (on metal) ensures a matt and textured finish, while liquid coating (on plastic) provides brighter and more uniform aesthetic effects. The combined use of aluminium and plastic components can lead to variations in colour rendering, affecting the visual homogeneity of the final product.
