C€ KK Conformity:

Light beam 360°.

All parts in direct contact with the soil must never be covered by the soil itself or come into contact with aggressive chemicals (e.g. fertilisers, herbicides, pool and/or floor cleaning products, etc.). Clean parts covered with soil build-up or cement dust periodically . Outdoor products must be installed with the appropriate plastic accessories. They must not be installed directly on the ground or directly on concrete because contact between the two materials can create accelerated oxidation of the device.
